GET WET!!!

July is here! The water is warming up and the fish are getting a little more active. Typically this time of year the fish are in the shallows starting to feed. As the water warms, the fish tend to move a little deeper. A few snorkelers have been shooting fish on the face of the dam. Most years that holds true. Let us hope that this is a good sign and that the

spearing continues to improve for the rest of the year.

Remember that you need a diver down flag even when you are snorkeling. A good trick is to mark either your speargun or

your flag lanyard to you know the size of fish you are harvesting. Happy Diving and good luck out there!

Diving for All

Scuba Diving is an exciting activity enjoyed by all ages. Whether it is local diving at Lake Oahe or on a dive vacation in the Caribbean, there is something for all to enjoy and expand your skills, knowledge, experience and equipment.

CLASSES

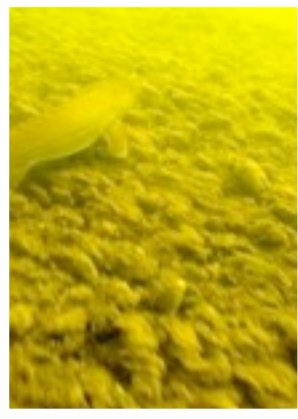

Pool Sessions
You will learn and perfect your scuba skills in the comfort and safety of the pool before

applying what you have learned in an open water setting. Our professional instructors will make you as comfortable as possible in the beginning steps of this amazing journey!!

Your Adventure to the underwater world starts here at Steamboat's

Have you ever wondered how it feels to float in zero gravity? To visit shipwrecks on the bottom of the ocean? To drop in on schools upon schools of walleye? These and many other adventures are opened up to you when you are a certified diver. You will learn all of the skills you need to become a confident and comfortable diver. Here at Steamboat's, we offer Open Water Diver Courses, Continuing Education Courses, Dive Trips, equipment, service, and Dive Charters. The

journey starts with an orientation here at the shop. You will receive a home study guide and dvd that you complete on your own time before the class. The classroom session is completed in a day then it is on to the pool where you apply what you have learned to actual diving situations. After completion of the pool session, it's off to the lake to do open water dives. You demonstrate skills you have learned and perfected and then we do the final check dives in the Tailrace, where the current just carries you along as you effortlessly check out the contours of the bottom and the fish swim up to check you out! After completing the course you are issued and certification card and you are off to discover all the underwater miracles awaiting you!!

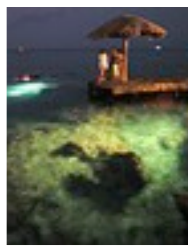

OPEN WATER DIVE CLASS

	Class	Pool	Open Water	Open Water

DIVE TRIPS

Dive into Paradise

We will be planning a dive trip to beautiful Cozumel, Mexico October 14 through the 21. \$875 per diver based on dbl occupancy

Included in Cozumel Dive Package

- 7 nights 5 diving days
- Two-tank boat dives daily

- Unlimited shore diving
- Three meals daily
- Hotel tax

The Package does not include drinks, airfare, transfers, gratuities, rentals, and expenses of a personal nature. If you like the tailrace drift dive, then you will love Cozumel diving. This is an opportunity to gain great drift diving experience in one of the world's greatest dive locations! If you need help to book airfare, Steamboat's will be more than happy to help you out. Need to hurry space is limited. To reserve your spot, \$350 non refundable deposit is due by August 16.

Scuba Club Cozumel

Voted as top ten dive destination. Built in 1976 by divers for divers. Scuba Club Cozumel is secluded from the busy downtown but within walking distance from town. This multilevel building has all the accommodations for divers to have an experience. The rooms will engulf you in the Mexican heritage with stucco and tile. All rooms have A/C for your comfort and are equipped with gear drying racks. The courtyard is lush with tropical flowers and adorned with stone carvings and tropical plants.

EQUIPMENT

NEW GLIDE X

This new BC will allow you to experience extremely comfortable diving. The SCUBAPRO exclusive wrap-around air bladder retains its cradle like shape even when fully

inflated. Fully adjustable, it comes with an integrated weight system and a wide range of exceptional features.

- Super Cinch Tank Band
- Fabric: N 420D/N 420 D
- QR Front Weight Integration
- Weight Integration Back Trim
- 4 stainless steel D-Rings
- Fully Adjustable Cumberbund
- Knife Grommets
- Padded Back Pack
- QR Rotating Shoulder Buckles

New Black Tech version

SCUBAPRO MERIDIAN: Intelligence at Hand

Engineered by divers for divers, the SCUBAPRO Meridian performs advanced functions in timeless style above and below the surface.

Use Meridian as a multi-function wrist watch, dive in SCUBA, APNEA or GAUGE modes-

SCUBAPRO delivers the best.

Displays are visually clear and easy to navigate. An intuitive +/- push of a button leads you to more advanced information and data. Housing in highest marine grade 316L stainless steel with two-toned brushed finishing, for heavy duty longevity with designer looks.

MERIDIAN COMPUTER: SCUBA | APNEA | GAUGE

SCUBA

The **Predictive Multi-Gas algorithm** lets you enjoy the full benefits of carrying high oxygen concentration mixes (21%-100% O₂ compatibility) in addition to your main breathing gas. Meridian calculates the decompression schedule for all possible gas combinations and in case you don't switch to the new mix, it adapts the calculation accordingly.

Complete Dive Planner calculates not only no-deco time but also total ascent rate, settings, workload, previous dives etc. and includes both gases if applicable.

Meridian's algorithm ZH-L8 ADT MB reduces the formation of micro-bubbles, making diving safer. By choosing a MB level between L0 and L5, you adjust the algorithm conservativeness, allowing you to either take up less nitrogen or off-gas more quickly

The unique integrated **Heart Rate Monitor** senses your effort, incorporates it into the workload calculation and then adapts the decompression algorithm. The result is safer diving, because each diver is unique, because each dive location and situation is different.

PDIS optimizes your dive in complete security for a safer and more pleasurable adventure. The **PDIS (Profile Dependent Intermediate Stops)** option calculates an intermediate stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives and breathing mixes. PDIS is a unique scientific application for safer, more optimized decompression.
